Buy sell insurance coverage supplies cash for the remaining partner to buy out the heirs according to a pre-arranged agreement. The insurable value is equal to the Fair Market Value (FMV) of the owned business interest plus a growth factor.
- To consider buy sell coverage, the following the following information may be required:

9. Occupation

9.1 Occupational Classification

- Class 2: Other white collar professional and occupation involving outdoor or site work or substantial amount of travelling or occasional manual work when supervising employees.
- Class 3: Skilled professional and occupation engaged in manual work not of particularly hazardous nature but involving the use of tools and machinery.
- Class 4: Professional (mainly unskilled) and occupation engaged in manual work involving the use of tools, machinery of a hazardous nature and working at heights.

9.2 Occupational Ratings

- The ratings were developed for markets where occupational safety standards and regulations have been enacted and enforced.
- In some cases, determining the occupation classification may be straightforward, such as Clerk or Physician, whilst other occupations may be a little more complex. In such instance, the ratings will be charged based on the particular hazards involved.
- If an applicant has more than one occupation, he/she will usually be rated for the most hazardous and/or occupation that represents the higher risk. Consideration will be given to more favourable rating where the person spends less than 20% of their total work time in the more hazardous occupation. If an applicant indicates that he contemplates entering a more hazardous occupation, he will be rated according to the intended occupation.
- The list provides a guide to the rating and classification of occupation. It is not merely the title of the occupation but the industry and specific nature of the life insured's occupation, which affect the rating and classification.
